I have retained highly respected pollster, McLaughlin & Associates, to analyze today's CNN Poll (and others), which I felt were FAKE based on the incredible enthusiasm we are receiving. Read analysis for yourself. This is the same thing they and others did when we defeated Crooked Hillary Clinton in 2016. They called SUPPRESSION POLLS, and are put out to dampen enthusiasm. Despite 3 1/2 years of phony Witch Hunts, we are winning, and will close it out on November 3rd!

Re: Skewed Media Polls
Date: June 8, 2020

The latest skewed media polls must be intentional. It's clear that NBC, ABC, and CNN who have Democrat operatives like Chuck Todd, George Stephanopoulos and other Democrats in their news operations are consistently under-polling Republicans and therefore, reporting biased polls. They continue to poll adults or registered voters that skew away from likely voters. So instead of the 33% Republican turnout which actually happened in 2020, they are reporting polls on only 26%, 25% or even 24% Republicans. Since you get over 90% of the Republican vote, for every point fewer Republicans that they do not poll, they reduce your vote total by a point. In contrast CBS polled likely voters. CBS had 32% Republicans and a clear national race. The bias seems to be an intentional strategy to suppress your vote. The latest media spin is that it's too late to define Joe Biden and it's too late for President Trump to win. We can hardly wait until they start spinning a "Biden electoral lock". It has to be a strategy to counter the enthusiasm of Trump voters.

For example, the CNN poll out today is another skewed anti-Trump poll of only 25% Republican. It's a poll of 1,259 adults - not even registered voters, let alone likely voters. Also, it was done between June 2nd and 3rd, before the great economic news from last Friday. In their questionnaire between asking about your job approval and the ballot, they had questions on issues including race relations, not job creation, which could have biased the poll further. It appears that the CNN poll is biased in both sample and questionnaire design to manufacture an anti-Trump outcome. https://info.com.com/2020/images/06/08/08/08_race_and_2020_poll.pdf

Specifically, the NBCWVS poll on Sunday was among registered voters, not likely voters, and is only 26% Republican. Again this skews Republicans about 7 points from the 2016 exit polls which had 33% Republicans. This poll was done May 28th through June 2nd and would not have a Friday's great jobs impact. <https://assets.documentcloud.org/documents/9338425/2020266-NBCWVS-June-Poll.pdf>

The refusal to screen for actual likely voters is creating an under-polling of Republicans and therefore Trump voters. It seems intentional. It's exactly what the media did in 2016. Let's prove them wrong again.
